- Changed Send A-D select to use Master, Click, Section, Shift+Section

Version 2.7.5 CHANGES

Added supercharging Presonus Faderport with Pro Tools. neyrinck.com/faderport

VERSION 2.7.4 CHANGES

Fixed Command8 for Logic Pro X to display status info at top correctly.

Fixed V-Console for Logic Pro X to display track names and other text.

Compatibility added for Nuendo 11 legacy V-Control Pro 1.9 for iPad.

VERSION 2.7.3 CHANGES

Apple M1 systems now supported for Logic Pro X. Other DAWs probably probably will work, but Cubase/Nuendo will not.

Logic Pro X users must delete their old surfaces in Control Surfaces / Setups... Logic Pro X 10.6 does not properly refresh a new control surface when it is added. Please close and re-open your project.

V-Control Pro 2.7.3 is compatible with Logic Pro X 10.6 and later only. If you are using version 10.5 or earlier, please install V-Control Pro 2.7.2.

For Logic Pro X, V-Control Pro 2.7.3 does not support multiple Pro Control Fader Pack devices at this time. If you have multiple Fader Packs, you must use V-Control Pro 2.7.2, which will only work on Intel Macs. At this time, multiple Fader Pack units are not supported on Apple M1 Mac systems.

Add support for Logic Pro X on Apple M1-based systems.

Fix hanging problem on Mac when computer name is long.

Compatibility with Adobe Premiere Version 15.1

VERSION 2.7.2 CHANGES

Fix Zoom Preset and Function button for Control24 and Cubase/Nuendo.

Compatibility with Mixbus32C Version 7 .

VERSION 2.7.1 CHANGES

Basic Reaper Support for Pro Control, Control24, C24, and Command 8.

VERSION 2.7.0 CHANGES

Digidesign Command 8 Support

- Mixbus

- Logic Pro X

- Ableton Live

- Presonus Studio One

Issues Fixed

- Cubase hanging with C24

- Windows Uninstaller not removing virtual Midi ports

VERSION 2.6.2 CHANGES

Cubase / Nuendo Improvements For ProControl / Control24, C24

- Master Fader Control

- Output Metering - Stereo and 5.1

- Auto-Bank Follow Function - Use Focus button for C24, Shuffle button for Control24, F1 button for Pro

Control

- F1 - F10 Programmable Buttons For Control24

VERSION 2.6.1 CHANGES

Added support for Mixbus with Pro Control / Control24, and C24

Added support for Ableton Live with Pro Control / Control24, and C24

Improvements for Logic Pro X and Pro Control / Control24, and C24.

- Assignable inserts

- Improved assignment of inputs, outputs, and sends

- Soft keys assignable in Logic Pro X controller assignments window.

- Stereo output metering

VERSION 2.6 CHANGES

Added support for Pro Control Edit Pack with Pro Tools.

VERSION 2.5.6 CHANGES

Improved V-Window to be compatible with Catalina security and privacy settings.

Fixed intermittent bug where an ethernet surface meters and counter freeze for a second.

Fixed zoom control of Cubase with cursor keys on Pro Control, Control24, and C24.

VERSION 2.5.5 CHANGES

Fixed Control 24 fader touch messaging for strips 9-24.

Improved Mac ethernet permissions handling for Catalina-level security.

VERSION 2.5.4 CHANGES

Added support for C24 Auto Talkback feature.

VERSION 2.5.3 CHANGES

Added support for latest Adobe Audition on Windows named Audition.exe.

VERSION 2.5.2 CHANGES

Added support for Nuendo 10.0

VERSION 2.5.1 CHANGES

Mac OS installer improved to be compatible with Catalina Gatekeeper.
Control improvements for Logic Pro X, Cubase/Nuendo, and Studio One.

Website Page Listings Of Control Features:

[Logic Pro X](#)

[Cubase / Nuendo](#)

[Studio One](#)

VERSION 2.5 CHANGES

Added support for the Digidesign C|24 control surface. Compatible DAWs are Logic Pro X, Cubase/Nuendo, and Studio One.

VERSION 2.4 CHANGES

Support for Presonus Studio One on Control24 and ProControl.
Pro Tools plug-in editing on Control24.
Logic Pro X enhancements for Control24 and ProControl.

IMPORTANT INFO FOR PRO CONTROL / CONTROL 24, C24 USERS

Windows systems that use ethernet surfaces Pro Control or Control 24 must install a separate utility called Win10Pcap. Please download and install it from here:

<http://www.win10pcap.org/download/>

Do not use WiFi for the connection between the computer and Pro Control / Control 24. Connect your computer's ethernet directly to the surface or use an ethernet switch for multiple surfaces.

IMPORTANT INFO FOR LOGIC PRO X AND PRO CONTROL / CONTROL 24 / C24 USERS

V-Control Pro 2.7.3 is compatible with Logic 10.6 and later only. If you are using Logic 10.5 or earlier, please install V-Control Pro 2.7.2.

V-Control Pro 2.7.3 does not support multiple Pro Control Fader Pack devices at this time. If you have multiple Fader Packs, you must use V-Control Pro 2.7.2, which will only work on Intel Macs. At this time, multiple Fader Pack units are not supported on M1 Mac systems.

If you are installing over a previous version of V-Control Pro, please delete the surfaces in in Logic Pro X / Control Surfaces / Setup...
Then QUIT Logic.
Then run this installer.

IMPORTANT INFO FOR CUBASE / NUENDO AND PRO CONTROL / CONTROL 24 C24 USERS

If you are installing over a previous version of V-Control Pro, please delete the surfaces in in Studio / Studio Setup...
Then QUIT Cubase / Nuendo.
Then run this installer.

IMPORTANT INFO FOR OWNERS OF V-CONTROL PRO 1 FOR IPAD

Ney-Fi has been renamed to “V-Control Pro” which runs on your computer instead of Ney-Fi. Launch “V-Control Pro” on your computer instead of Ney-Fi and continue to use V-Control Pro 1 for iPad.

You do not need to purchase anything new to get the same features you had previously.

If you want to use the new V-Control Pro 2 features, only then do you need to purchase a license. The initial new features are:

- * V-Console is a new app for mix and edit control
- * V-Console supports 16 tracks of control on a single device
- * V-Console controls up to 32 tracks
- * multiple controllers
- * supports smartphones

QuickStart Instructions

1. Run the installer.
2. Launch V-Control Pro from the /Applications folder. You will see a ‘V’ icon in the menu bar.
3. Launch a DAW that you want to control.
4. Open the Setups window in V-Control Pro by clicking in the menu bar.
5. When you see the DAW listed in Setups, click on it and select Setup Guide for instructions to set up your DAW.
6. Using an iOS device, Android device, or desktop web browser, go to vcontrolpro.com and load the V-Console control app. In V-Console settings for Connection, select your computer.

Licensing

V-Control Pro 2 operates with limited features if not licensed. You can see lock indicators in the Setups window to see which controls are disabled. V-Control Pro 1 for iPad is fully functional if not licensed. You can purchase a license at neyrinck.com/store.
